AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions and listings of claims in the application:

LISTING OF CLAIMS:

1. (previously presented): A method of data entry at a device, comprising:

receiving voice data at the device;

transmitting the voice data and a device identifier to a computer; and

at the computer,

translating the voice data to text;

determining whether to filter the translated text; and

if it is determined that the translated text is to be filtered, applying a filter to the translated text.

2. (original): The method of claim 1, further comprising storing a user profile in a data store connected to the computer.

3. (original): The method of claim 2, wherein the user profile comprises a voice print.

4. (original): The method of claim 3, further comprising translating the voice data to text using a voice print.

5. (original): The method of claim 1, wherein determining comprises extracting one or more key words from the translated text.

6. (original): The method of claim 5, wherein a filter is selected based on one or more extracted key words.

7. (original): The method of claim 1, wherein applying the filter comprises formatting the translated text.

8. (original): The method of claim 7, wherein formatting comprises formatting the translated text for an application.

9. (original): The method of claim 7, wherein formatting comprises formatting the translated text for the device.

10. (original): The method of claim 1, further comprising returning translated text to the device.

11. (original): The method of claim 1, further comprising returning filtered text to the device.

12. (original): The method of claim 11, further comprising returning the filtered text via an electronic mail message.

13. (original): The method of claim 1, further comprising returning data to a device other than the device at which voice data was received.

14. (previously presented): An apparatus, comprising:

a device for receiving and transmitting data;

a computer having a data store coupled thereto, wherein the data store stores data, connected to the device; and

one or more computer programs, performed by the computer for:

receiving voice data and a device identifier from the device;

4

translating the voice data to text;

determining whether to filter the translated text; and

if it is determined that the translated text is to be filtered, applying a filter to the translated text.

15. (original): The apparatus of claim 14, further comprising storing a user profile in a data store connected to the computer.

16. (original): The apparatus of claim 15, wherein the user profile comprises a voice print.

17. (original): The apparatus of claim 16, further comprising translating the voice data to text using a voice print.

18. (original): The apparatus of claim 14, wherein determining comprises extracting one or more key words from the translated text.

19. (original): The apparatus of claim 18, wherein a filter is selected based on one or more extracted key words.

20. (original): The apparatus of claim 14, wherein applying the filter comprises formatting the translated text.

21. (original): The apparatus of claim 20, wherein formatting comprises formatting the translated text for an application.

22. (original): The apparatus of claim 20, wherein formatting comprises formatting the translated text for the device.

23. (original): The apparatus of claim 14, further comprising returning translated text to the device.

24. (original): The apparatus of claim 14, further comprising returning filtered text to the device.

25. (original): The apparatus of claim 24, further comprising returning the filtered text via an electronic mail message.

26. (original): The apparatus of claim 14, further comprising returning data to a device

other than the device at which voice data was received.

27. (previously presented): An article of manufacture comprising a program storage

medium readable by a computer and embodying one or more instructions executable by the

computer to process data entered at a device, comprising:

receiving voice data at the device;

transmitting the voice data and a device identifier to a computer; and

at the computer,

translating the voice data to text;

determining whether to filter the translated text; and

if it is determined that the translated text is to be filtered, applying a filter to the

translated text.

28. (original): The article of manufacture of claim 27, further comprising storing a user

profile in a data store connected to the computer.

29. (original): The article of manufacture of claim 28, wherein the user profile

comprises a voice print.

30. (original): The article of manufacture of claim 29, further comprising translating the voice data to text using a voice print.

31. (original): The article of manufacture of claim 27, wherein determining comprises extracting one or more key words from the translated text.

32. (original): The article of manufacture of claim 31, wherein a filter is selected based on one or more extracted key words.

33. (original): The article of manufacture of claim 27, wherein applying the filter comprises formatting the translated text.

34. (original): The article of manufacture of claim 33, wherein formatting comprises formatting the translated text for an application.

35. (original): The article of manufacture of claim 33, wherein formatting comprises formatting the translated text for the device.

36. (original): The article of manufacture of claim 27, further comprising returning translated text to the device.

37. (original): The article of manufacture of claim 27, further comprising returning filtered text to the device.

38. (original): The article of manufacture of claim 37, further comprising returning the filtered text via an electronic mail message.

39. (original): The article of manufacture of claim 27, further comprising returning data to a device other than the device at which voice data was received.

40. (New): The method of claim 1, wherein the device identifier comprises a unit identifier which identifies a particular device operated by a user.
